

LOGISTICS CIVIL AUGMENTATION PROGRAM (LOGCAP)_

Advance Planning Briefing to Industry (APBI)
Subcontract Opportunities
20 AUGUST 2008

★★★***ASC - On The Line***

UNCLASSIFIED

What is LOGCAP

The Logistics Civil Augmentation Program (LOGCAP) is an initiative by the United States Army to pre-plan during peacetime for the use of civilian contractors to perform selected services in wartime and other contingencies to augment US forces in support of Department of Defense (DoD) missions.

- LOGCAP's primary focus is to provide support and improve the operational strength of US Army forces.
- LOGCAP can also provide support to other US military services, coalition and/or multinational forces, and other government/non-government agency components in support of joint, combined, coalition and multinational operations. This includes operations other than war, such as peacekeeping or humanitarian assistance missions.

Why LOGCAP

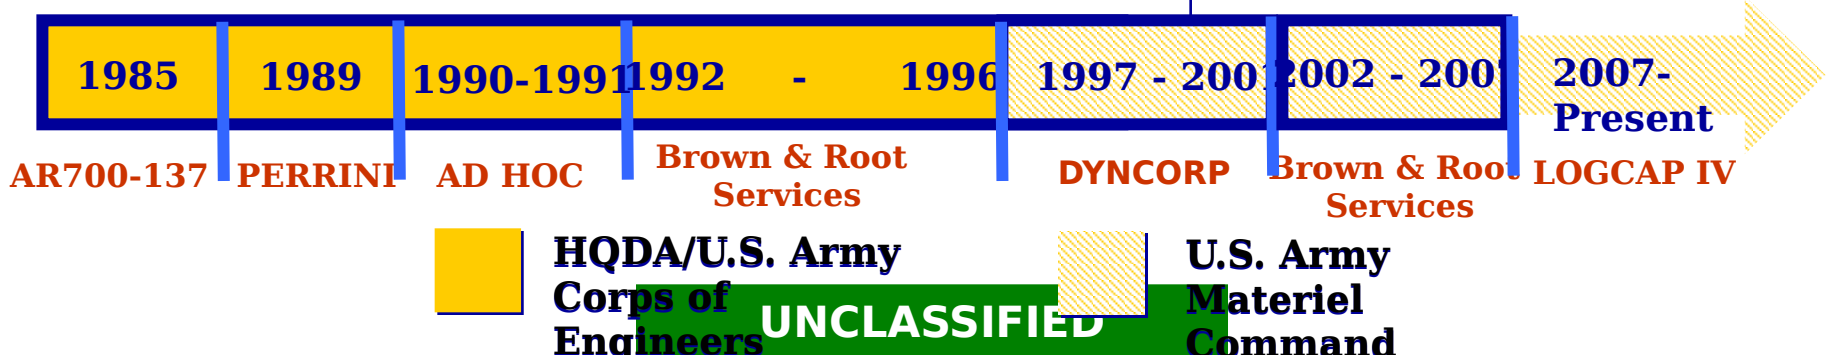

- ✓ **Substantial reduction in military force structure, during the Post-Vietnam Era, pressured the US Military to outsource CS/CSS for wartime and other contingency use.**
- ✓ **Allows the US Army to surge CS/CSS requirements and then turn off when not needed - maximizes resources.**

LOGCAP History

PUSH VS. PULL SYSTEM

LOGCAP IV

✓ **Planning and Program Support contractor**

- SERCO Incorporated – awarded on 16 Feb 07
- Base year with four one-year options
